RE: MINIMUM PLAN SUBMITTAL REQUIREMENTS FOR  
**SINGLE-FAMILY DWELLINGS**

---

The City of Scottsdale will not accept incomplete plans for compliance review of single family dwellings

The Development Services Unit will require all single family residential plans submitted for first review to meet minimum submittal requirements, including engineered truss designs when applicable. A ***plan submittal check sheet*** will be used to determine whether plans are complete for review.

Incomplete submittals absorb unnecessary plan review and customer time. Deficient plan information provides insufficient opportunity for plan review comments. Consequently , such plans are rejected and will not receive correction comments until the second submittal, requiring a third submittal for approval before building permit issuance.

By establishing minimum submittal requirements, we hope to reduce the number of plan resubmittals.

***Attachment: Minimum Plan Submittal Check Sheet.***

## Single Family Standard Plan Submittal

### 1. Building / Fire Review

(Note: separate fire sprinkler plan must be submitted for review.)

- ☐ One (1) complete set.
- ☐ When trusses are used, provide two complete sets of engineered truss designs sealed by an Arizona licensed engineer and keyed to framing plan; or Truss waiver certificate signed and sealed by the licensed "architect or engineer of record" who sealed the plans for the structural design of the overall building (plans & waiver must be sealed by the same architect or engineer.)
- ☐ Soils report.
- ☐ Water meter calculation sheet.

### 2. Planning Review

- ☐ A) One (1) elevation sheet(s) showing finish floor to maximum height of roof. Location of A/C and mechanical equipment noting "All A/C and mechanical equipment shall be screened a minimum of one foot above the highest point of the equipment".
- ☐ B) One (1) floor plan.
- ☐ C) One (1) foundation plan.
- ☐ D) One (1) 24" x 36" subdivision plat map.
- ☐ E) One (1) 24" x 36" grading and drainage plan.
- ☐ F) Lot fit analysis (addressing both vertical and horizontal compliance for each plan.

## Options to Standard Plans

Please note:

The square footage of any single option or combination of options cannot exceed 10% of the original floorplan.

Basements are not considered as an option to a Standard Plan. If the plan includes a basement it must be submitted as a new Standard Plan.

## **notice**

### **PLAN SUBMITTAL REQUIREMENTS FOR PROJECTS INCORPORATING RETAINING WALLS**

#### **All private project development plans**

in the "building review" sets of plans :

include retaining wall details and calculations, and a copy of the civil grading site plan with any retaining walls or other structures called out. Retaining walls must have the top of wall and top of footing elevations noted.

in the "civil review" sets of plans :

the civil grading site plan must have any retaining walls or other structures called out. Retaining walls must have the top of wall and top of footing elevations noted. Any change in site grading that affects the height or configuration of retaining walls will be transmitted to the person reviewing the building plans.

#### **City infrastructure, subdivisions and development projects without buildings**

include details and calculations of retaining walls and other structures in the "civil review sets of plans.

#### **Fees (onsite private development) :**

<b>Bridges</b>	<b>one-half building square foot fee except for minimum</b>
----------------	---

<b>Retaining Walls :</b>	<b>same as fence fee - lineal feet</b>
--------------------------	--

**CITY OF SCOTTSDALE**  
**SINGLE FAMILY RESIDENCE**  
**WATER METER SIZE**  
 revised 12/95

Plan Check # \_\_\_\_\_  
 Date : \_\_\_\_\_

**To determine your water meter fee, your water development fee and your sewer connection fee, you must know the size of the water meter required for your residence. To determine the correct size, please provide the following essential information.**

1) Total number of fixture units of all water-using outlets is:

Type of Fixture	Fixture Unit Value	Number of Fixtures	Total Fixture Units
Bidet	2 X	_____	= _____
Water Closet	3 X	_____	= _____
Shower	2 X	_____	= _____
Tub	2 X	_____	= _____
Lavatory	1 X	_____	= _____
Kithcen Sink	2 X	_____	= _____
Dishwasher	2 X	_____	= _____
Bar Sink	1 X	_____	= _____
Hose Bibbs (include only 2)	3 X	2	= 6
Laundry Sink	2 X	_____	= _____
Clothes Washer	2 X	_____	= _____
Evaporative Cooler	1 X	_____	= _____
Ice Maker	1 X	_____	= _____
Other *	_____ X	_____	= _____
TOTAL			= _____

\*Water supply outlets for items not listed above shall be computed at their maximum demand or according to the size of the supply pipe as indicated in the Uniform Plumbing Code; whichever is greater.

2) Total length of the water line from the water meter to the farthest water-using outlet/fixture is \_\_\_\_\_lineal feet.

3) Local water service pressure is \_\_\_\_\_pounds per square inch (psi).

**Note:** It is your responsibility to obtain a water pressure field test at your site or as near to your site as possible. Your building permit **cannot be issued** until you have done so.

**Note:** An approved type pressure regulator preceded by an adequate strainer shall be installed and the pressure reduced to eighty (80) psi or less.

Date

**to be completed by plan reviewer:**

Size of Meter: \_\_\_\_\_ Size of Building Supply \_\_\_\_\_

This does NOT permit the violation of any section of any federal, state or local regulations.

When approved by the City of Scottsdale, the Applicant must deliver a copy of this form, or the City approved plans, to the Fire Sprinkler Designer to use in the calculation of the fire sprinkler system. Verification of the Meter size must accompany Fire Sprinkler plans submitted for review.

**CITY OF SCOTTSDALE  
SINGLE FAMILY DWELLINGS  
TRUSS DESIGN REVIEW WAIVER**

This certificate may be used in lieu of city review of prefabricated trusses for single family residences.

Subdivision:	
Address:	
Plan Check No.:	Standard Plan No.:

**As the registered professional in charge of structural design of the building, I will review the selected `approved' fabricator's truss designs and related connections, and subsequent revisions provided to me, for compatibility with the above referenced project, and affix my shop drawing stamp or other means of identification.**

\_\_\_\_\_  
(Print) Reg. Professional in Charge of Bldg.Plans

**SEAL**  
(Signature & Date)

**As the Owner/Applicant/Authorized agent, I agree that all truss design information will be provided to the registered professional in charge of the structural design of the building, for review, including the use of alternate fabricators, variations in design from the original trusses or change in placement.**

\_\_\_\_\_  
(Print) Name & Title

\_\_\_\_\_  
Signature

\_\_\_\_\_  
Date

**NOTE: Truss design sheets shall be signed, sealed and dated within the current code year by an Arizona registrant. Engineered truss designs, reviewed by the design professional in charge of the building structural design, shall be attached to the field set of City reviewed plans prior to the trusses being set in place.**

This does NOT permit the violation of any section of the Uniform Building Code or any federal, state or local regulations.

## 2003 INTERNATIONAL RESIDENTIAL CODE Building Code Plan Review Checklist

[http://www.scottsdaleaz.gov/bldgresources/Forms/2003\\_IRC\\_PLAN\\_REV\\_CHECKLIST.pdf](http://www.scottsdaleaz.gov/bldgresources/Forms/2003_IRC_PLAN_REV_CHECKLIST.pdf)

### CONSTRUCTION DOCUMENTS MINIMUM DESIGN GUIDELINES

TABLE R301.2 (1).

#### CLIMATIC AND GEOGRAPHIC DESIGN CRITERIA

ROOF SNOW LOAD	WIND	SEISMIC DESIGN CATEGORY <sup>4,g</sup>	SUBJECT TO DAMAGE FROM				WINTER DESIGN TEMP <sup>f</sup>	FLOOD HAZARDS <sup>h</sup>
	Speed <sup>e</sup> (mph).		Weathering <sup>a</sup>	Frost line depth <sup>b</sup>	Termite <sup>c</sup>	Decay <sup>d</sup>

#### BUILDING CODE DESIGN DATA

All construction within Scottsdale shall comply with the following codes and amendments per their adopting ordinances:

2003 International Building Code	(ord. # 3505)
2003 International Residential Code	(ord. # 3505)
2003 International Mechanical Code	(ord. # 3506)
2003 International Fire Code	(ord. # 3507)
1994 Uniform Plumbing Code	(ord. # 2785) IAPMO
1999 National Electrical Code	(ord. # 3413)

**APPLICANT: Correct plans where the following items have been checked.**

- ☐ Provide Civil Site plan.
- ☐ Refer to plan set for red lines. Correct plans as marked or submit equivalent alternate corrections.
- ☐ Indicate the sheet number of your corrections next to the items circled on these sheets.
- ☐ IRC sections indicated are for your convenience in detailing code requirements.
- ☐ Do not quote code IRC Sections in lieu of providing plan set notes and revised details.
- ☐ **IMPORTANT:** Please return all documents indicated on the Resubmittal Checklist.
- ☐ Plan set is incomplete. Next submittal may require additional review(s).
- ☐ Plans must be readable and to "scale".
- ☐ Specification books on Single Family Plan checks are not acceptable.
- ☐ Place all required notes on the drawings.
- ☐ Provide a True North Arrow and an Orientation North Arrow on site plans and floor plans.

## 2003 INTERNATIONAL RESIDENTIAL CODE

### Building Code Plan Review Checklist

#### A. Standard Plans

1. Provide a soils report and a compaction tests for the subdivision.
2. Per the soils report provide over-excavation and / or re-compaction for foundations and slabs on grade.
3. Place the following notes in **bold type** on the foundation plan and floor plan sheets:
  - a. This standard plan is not approved for locations within 3 feet of an adjacent property line. (NOTE: Zoning setbacks or Design Review Board stipulations may be more restrictive.) (R302.1)
  - b. Projections shall not extend more than 12" into the areas where openings are prohibited.
  - c. Overhangs and projections within 3' of the property line shall be of one-hour fire resistive construction.
  - d. Eaves over required bedroom egress windows shall not be less than 30" from the side and rear property lines.
4. Provide a continuous 3' wide path of travel from all bedroom egress windows to a public way.
5. Show minimum allowable dimensions from stem wall to property lines on foundation plan.
6. Remove all parcel/lot specific information from plan set. (i.e. site plan).
8. Reference on site plan, structural details for each retaining wall and fence.
9. Provide structural calculations for retaining walls. City of Scottsdale, Administrative Policy 96-6.
10. Show sewer tap location at street. (UPC 710.1).
11. Show and identify next upstream manhole rim location and elevation, address backwater valve. (UPC 710.1).
12. If septic system, provide copy of septic system permit application from Maricopa County. (UPC 305.2).
13. Address pool barrier requirements. (2003 IRC, AG103.1).
14. Provide minimum 3-foot wide, minimum 60-inch high, out-swinging, self-closing gate. (AG103.1).
15. Provide 36" guardrails at change in elevations that are greater than 30".

#### B. Additions/ Alterations/ Remodels

1. Provide scope of work.
2. Provide separate existing and demolition plans.
3. Clearly identify throughout, existing vs. new vs. remodeled area.
4. Complete and return fire sprinkler worksheet. [Link](#).
5. Address smoke detectors throughout house with additions/alterations/remodels. (F313.1 *amended*, R313.1 *amended*).

#### C. Site Plan

1. Provide a complete civil grading and drainage site plan. (R321.1).
2. Provide a complete legal description.
3. Provide project address.
4. Provide Maricopa County Assessor Parcel Number.
5. Show location of structure(s) with set back dimensions on civil site plan. (R321.1).
6. Provide lineal footage of fences and retaining walls.
7. Show location of all fences and retaining walls on site plan.

#### D. GREEN BUILDING

1. Provide a separate plan sheet listing the minimum 26 "green" building requirements and the options selected from the 150 available. Include the points permitted for each selection and a total summary (minimum 56 points).
2. Include the "green" building requirements in the plan design, notes and details, (i.e. borated wood plates in lieu of P.T. plates, non-solid sawn lumber, etc).
3. Provide the most current Testing or Evaluation Report for the Building Product(s), i.e. Rastra, Eco-block, Tech-Block, Etc.
4. Incorporate Designs, Details, Instructions and Requirements from the Evaluation Report(s) onto the plans and reference where applicable.
5. Place the following note in large text on the Plan Sheets (Floor, Foundation, Roof Framing):

NOTE: To maintain "Green Building" status, separate "Green Building" inspections are required prior to covering work.

## E. Floor plans

### a) Doors and Windows

1. Provide a solid...self-closing, self-latching door between residence and garage. (R309.1 *amend.*).
2. Provide landing on outside of exterior doors. (R311.4.3).
3. Doors shall not open directly between a sleeping room and a garage. (R309.1).
4. Show type of shower enclosure. (R307.2, 308.4).
5. Shower doors shall have safety glazing and shall swing out. (R308.4).
6. Provide and identify all required safety glazing. (R308).
7. Indicate emergency escape and rescue openings in basements and bedrooms. (R310.1).
8. Show direction of door swing. (R311.4.3 *amended*).
9. Show size of each window and type of operation. (R303.1, 310.2).
10. Show type of structural silicone for butt-glazed windows. (Interpretation 98-11).
11. 15% glazing or less provide U-factor 0.60 and Solar Heat Gain Coefficient (SHGC) 0.40
12. 25% glazing or less provide U-factor 0.45 and SHGC 0.40
13. Opaque doors separating conditioned and unconditioned space shall a maximum U-factor 0.35

### b) Light and Ventilation

1. Provide required natural light for habitable rooms (R303.1).
2. Provide required natural ventilation for habitable rooms (R303.1).
3. Provide mechanical exhaust ventilation for bathrooms, water closet rooms, laundry room, and kitchen, ducted direct to outside. (R303.2 amended, M1506, Table 1506.3).
4. Provide attic ventilation per (R806.1)

### c) Stairways, handrails, guardrails

1. Show handrail, notes and dimensions where required (R311.5.6-311.5.6.3).
2. Show guardrails where required. (R312.1, .2).
3. Provide a floor or landing at the top and bottom of each stairway. (R311.5.4).
4. Provide code complying stairways, address tread and riser dimensions per type of stairway. (R311.5).
5. Provide stairway illumination per (R303.6)

### d) Fire Places/Gas Appliances

1. Provide manufacture, model number and ICBO/ICC report or equal for each fireplace. (R1002, 1004, 1005).

2. Provide a permanently installed approved gas log set. (R1004.4).
3. An unvented gas log heater shall not be installed in a factory-built fireplace unless the fireplace system has been specifically tested, listed and labeled for such use in accordance with UL 127. (R1004.4).
4. Decorative shrouds shall not be installed at the termination of chimneys of factory-built fireplaces except where listed and labeled for such use. (R1004.3)
5. Provide outside combustion air for fireplaces located in bedrooms. (R1005.1.1).

### e) Mechanical Equipment

1. Show mechanical equipment and water heaters on 18-inch platform if placed in garage or room with direct access to garage. (M1307.3 *amended*).
2. Provide combustion air and show hi and low vent sizes for gas fuel appliances located in *confined* spaces. (M1702.2, M1703.2).
3. Provide and reference approved detail for gas piping to gas island cooktop.
4. Provide kitchen exhaust fan vented direct to outside. (M1505.6, Table 1506.3)
5. Manufacturer's installation instructions, as required by this code, shall be available on the job site at the time of inspection. (Section R106.1.2).
6. Provide minimum 78% AFUE (Annual Fuel Utilization Efficiency) for gas heating equipment.
7. Provide minimum 12 SEER (Seasonal Energy Efficiency Ratio) for air conditioning equipment.
8. Duct insulation when located in conditioned space minimum R-5 and outside conditioned (such as attic) space minimum R-8.

### e) General Floor Plan

1. Show ceiling heights for all rooms, spaces and hallways. (R304).
2. Show minimum clearances from centerline of water closets to finished wall, cabinets, and other plumbing fixtures. (UPC 408.5).
3. Gypsum Board applied to a ceiling shall be 1/2" when framing members are 16" o.c. or 5/8" when framing members are 24" o.c. or use labeled 1/2" **sag-resistant gypsum ceiling board**. Table R702.3.5 (d).

#### **f) Energy/Insulation Requirements**

1. Walls with 15% glazing or less require minimum R-30 ceilings, R-13 walls. (Table N1102.1 *amend.*)
2. Walls with 16% to 25% glazing or less require minimum R-38 ceilings, R-19 walls. Table N1102.1 *amend.*
3. Complete and return energy compliance worksheet or equal report.

#### **g) Manufacturers' Installation Instructions**

1. Manufacturer's installation instructions, as required by this code, shall be available on the job site at the time of inspection (R106.1.2)
2. RANGES AND COOKTOPS: Show note on plans.  
-Provide a listed and approved range and/or cooktop unit installed in accordance with the listing and with the manufacturer's installation instructions. VERIFY AND MAINTAIN REQUIRED HORIZONTAL AND VERTICAL CLEARANCES ABOVE THE FINISHED COUNTERTOP SURFACE BEFORE ORDERING OR INSTALLING CABINETS-.

#### **F. Shearwall Plan**

1. Provide a complete shearwall plan and reference a shearwall schedule at each shearwall location. (R602.10).
2. Provide a complete shearwall schedule, including anchor bolts, holdowns, studs and spacing, sheathing and nailing. (Table 602.3(1))
3. Address 'alternate braced wall panels' per (R602.10.6).
4. Coordinate post locations with holdowns on foundation plan. (R602.11.1).
5. Show and identify each required holdown on foundation plan.
6. Show anchor bolt sizes and spacing. (R403.1.6, 403.1.6.1).

#### **G. Elevation Plan**

1. Provide minimum of four elevation drawings of building, typical front, back, left, right.
2. Show building heights and dimensions.
3. Show and label all exterior building materials. (R703).
4. Show manufacture, model number and ICBO/ICC/NER Report Number for stucco, roof materials, stone veneer. (R703.7).
5. Show weepscreed with notes or detail at typical exterior wall and at stone veneer locations. (R703.6.2.1).
6. Provide weather flashing/proofing and exterior wall penetrations/openings. (R703.1, 703.2, 703.8).
7. Label all safety/Temp glazing on each elevation. (R308).

#### **H. Sections**

1. Provide minimum two building cross sections.
2. Cut cross-sections on foundation, floor and roof framing plans.
3. Show required fire blocking on each section. (R602.8).
4. Show height dimensions on each section.
5. Label all rooms, spaces, and hallways on each section.
6. Provide and reference/key structural details for critical connections for cross-sections.

#### **I. Wall Construction**

1. Provide a cross section detail and wall legend for each type of wall.
2. Callout exterior materials, including, stucco system, lath, building paper, foam, and sheathing where required. (R703).
3. Specify on plans, interior wall materials. (R702).
4. Address required pressure treated bottom sill plates (R320.1).
5. Specify on plans, interior wall construction, coverings, and backings for tile and in wet locations. (R702).
6. Provide weepscreed and dimensions from soil and paved surfaces. (R703.6.2.1).
7. Provide nailing schedule. (R602.3 (1)).

#### **J. Foundation Plan**

1. For single-family custom submittal, provide a soils report or a soils waiver, signed by owner.
2. Provide a complete fully dimensioned and detailed foundation plan.
3. Show isolated footing dimensions, and reinforcing. (Table R403.1).
4. Show note: Exterior and interior footings shall bear minimum 18 inches below undisturbed soil or engineers certified compacted fill. (Table R 403.1).
5. Show required reinforcing steel for all footings and stem. (Table R 403.1).
6. Reference a complete set of structural details, footing, stem, turndown, pad footing, post at stem...
7. Clearly show, dimension and detail interior footings and shearwall footings.
8. Clearly show each required post location on foundation plan, coordinate with shearwall and roof framing plans.
9. Clearly show and label each required holdown on foundation plan. (R403.1.6).

10. Show and detail building retaining walls and basement and foundation walls.
11. Provide any/all slab elevations.
12. Clearly identify interior bearing wall footing.

### K. Floor and Roof Framing Plans

1. Provide a complete fully detailed floor and/or roof-framing plan. (R106 amended).
2. Clearly identify all framing members, including posts/columns, headers, beams, joists, and trusses. (R106 amended).
3. Provide floor/ceiling assembly DRAFTSTOPPING per (R502.12).
4. Clearly show each required post and size, coordinate with foundation plan.
5. Show and identify posts from above framing.
6. Show floor-to-floor tie, mechanical connectors.
7. Clearly show and identify all truss/joist hangers.
8. Clearly show and identify beam to post mechanical connectors.
9. Clearly show and key detail reference(s) for each beam to post, beam-to-beam, girder to beam connections.
10. Detail typical truss/joist to wall, beam, girder connections.
11. Locate and **key each truss** on roof/floor framing plan per truss manufacturer layout sheet.
12. If pre-qualifying conditions are met, provide a completed truss waiver.
13. Show lateral full height blocking at bearing points for joists, rafters and trusses.
14. Framing details shall reflect types of framing members, trusses flat and sloped, I-joists, dimension lumber rafters...
15. Show stair mechanical attachment at top and bottom.
16. Framing members to accommodate masonry fireplace clearances to combustibles. (1005.15)
17. Provide seismic strap per (R1003.4, .4.1).
18. Framing members to accommodate mechanical equipment requirements if installed in attic.

### L. Structural Calculations

1. Provide the following structural engineering calculations:
  - a. Gravity loads analysis.
  - b. Lateral loads analysis.
  - c. Retaining wall calculations per policy #96-6.
  - d. Provide special inspections per (IBC Ch. 17).

### M. Masonry Construction

1. General Masonry Construction (R606)
2. Glass Block Masonry (R610)
3. Insulating Concrete Form (R611)

### N. Electrical Plan

1. Provide a complete Electrical Plan. (R106 amended).
2. Provide fully noted plan showing, all required receptacles, light fixtures, switches, exhaust fans, smoke detectors, service panels and sub-panels. (E3603, E3603.2 amended, E3801.1, E3802).
3. Provide notes and symbols legend.
4. Show and label all required GFCI and WP/GFCI receptacles. (E3802.8, .9).
5. Show and label all required AFCI receptacles in bedrooms. (E3802.11).
6. Show and label all WP/DP lighting fixtures as SUITABLE FOR WET OR DAMP LOCATIONS accordingly. (E3903.8).
7. Show and label all smoke detectors. (F313.1 *amended*, R313.1 *amended*).
8. Provide **IC** rated recessed light fixtures installed in insulated ceilings. (NEC 110-3(b), 41-66(b)).
9. Provide a UFER ground encased in concrete footing. (E3508.1.2).
10. For Electrical Services greater than 200 amps, PROVIDE ELECTRICAL LOAD CALCULATIONS. NEC 220.
11. Provide electrical load calculations for the service and each sub-service panel. NEC 220.
12. Provide an ELECTRICAL SINGLE LINE DIAGRAM for Services larger than 200 amps.

### O. Plumbing Plan

1. Provide a single line gas-piping diagram; include all gas burning appliances and BTUs of each appliance, show pipe *lengths* and *sizes* from gas meter to each branch line and to each appliance. (UPC Table 12-1, Table 12-3, 1217.1).
2. Show type of gas piping. (UPC 1210.1).
3. Do not place gas piping under slab. (UPC 1211.3, Policy 88-6).
4. Provide approved detail for gas piping to kitchen island gas cook top. (UPC 1211.3).
5. Show all water piping materials. (UPC 604.1).
6. Show all sewer piping materials. (UPC 701.1).
7. Provide low flow plumbing fixtures. (UPC 402.3-6).

### P. Fire Sprinklers

1. Provide fire sprinklers per (R324. *amnd.*).

[illegible]

## REQUIRED RESIDENTIAL NOTES

The following notes shall be incorporated into the plans. If these notes are reproduced on the plans as a block, it will facilitate the review of the project. The notes are available in a dwg format and can be downloaded from.

[www.scottsdaleaz.gov/design/DetailDrawings/DesignDetails.asp](http://www.scottsdaleaz.gov/design/DetailDrawings/DesignDetails.asp)

## PLACE THE FOLLOWING REQUIRED NOTES ON THE DRAWINGS:

**Governing Building Codes** All construction shall comply with the following codes and amendments per their adopting ordinances:

2003 International Building Code	(ord. # 3505)
2003 International Residential Code	(ord. # 3505)
2003 International Mechanical Code	(ord. # 3506)
2003 International Fire Code	(ord. # 3507)
1999 National Electrical Code	(ord. # 3413)
1994 Uniform Plumbing Code	(ord. # 2785) IAPMO Edition

- All products listed by ICC/N.E.R. number(s) shall be installed per the report and manufacturer's written instructions. Product substitution(s) for product(s) listed shall also have an ICC approved evaluation report(s) or be approved.
- Exterior wall, bottom sill plates, shall be pressure treated or equal, and shall bear/extend minimum 6 inches above finish grade. (R319.1).
- Provide fire protection sprinkler system. (R903.2 as Amd.).
- Miscellaneous site structures, pools, spas, fences, site walls, retaining walls, and gas storage tanks require separate permits.
- Minimum one required exit for an occupant load of less than 10. (R311.4.1)
- All exits to be operable from the inside without the use of a key or special knowledge.
- Doors leading into house from garage shall be self-closing and tight fitting with gaskets and sweep (R309.1 Amd.).
- Exterior wall penetrations by pipes, ducts or conduits shall be caulked. (R307.6)
- Provide roof attic ventilation per (RC 806.1)
- Minimum insulation shall be:
  - Walls with 15% glazing or less require minimum insulation of R-30 ceilings, and R-13 walls. Table N1102.1 amend.
  - Walls with 25% glazing or less require minimum insulation of R-38 ceilings, and R-19 walls. Table N1102.1 amend.
- Lumber shall bear an approved grading stamp (R502.1).
- Fire blocking shall comply with (R602.8) and be maximum 10 ft. O.C., horizontal or vertical.
- Floor-ceiling assemblies with a concealed space in excess of 1000 square feet shall have draft stops installed that divide the concealed space into approximately equal areas. Draft-stopping material shall comply with (R502.12)
- Walls and soffits of enclosed usable space under interior stairways shall be protected on the enclosed side by minimum ½" gypsum board. (R311.2.2)
- Gypsum board applied to a ceiling shall be 1/2" when framing members are 16" o.c. or 5/8" when framing members are 24" o.c. or use labeled 1/2" **sag-resistant gypsum ceiling board**. Table R702.3.5 (d).
- Shower area walls shall be finished with a smooth, hard non-absorbent surface, such as ceramic tile, to a height of not less than 72 inches above the drain inlet. When gypsum wallboard is used as a base for tile or wall panels, water-resistant gypsum wallboard shall be used. Water-resistant gypsum board shall not be used over a vapor retarder, in areas of high humidity or on ceilings where the frame spacing exceeds 12 inches on center for ½ gypsum, and 16 inches on center for 5/8 gypsum (R702.4.2)

17. Plumbing fixtures shall comply with the following conservation requirements: UPC 402. *Amnd.*
  - a. Water closets-Tank type = 1.6 gal. /flush.
  - b. Shower heads- 2.75 gal. /minute.
  - c. Faucets- 3.0 gal. /minute, provide aerator.
18. Water treatment systems- shall be equipped with an automatic shutoff to prevent continuous flow when not in use.
19. Evaporative coolers shall have re-circulating pumps.
20. Provide an expansion tank at the water heater if a backflow preventer is or will to be installed on the water line or at the meter. (UPC Section 608.3).
21. Showers and tub-shower combinations shall be provided with individual control valves of the pressure balance or thermostatic mixing valve type. (UPC Section 410.7).
22. Domestic dishwashing machines connected to a disposer shall have the discharge installed as high as possible, not lower than 2" above the flood rim of the sink. (UPC 807.4).
23. Registers, diffusers and grilles shall be mechanically fastened to rigid supports or structural members on at least two opposite sides in addition to being connected to the ductwork they serve.
24. The clothes dryer shall be provided with a 4-inch diameter exhaust duct to the exterior and shall not exceed a total length of 25 feet, unless an engineered duct system is provided. (M1501.3) The duct shall terminate not less than 3 feet from a property line or from openings into a building.
25. Provide **IC**-rated recessed light fixtures installed in insulated ceilings. (NEC 110-3(b), 41-66(b)).
26. Fixtures located in damp or wet locations shall be "listed" to be suitable for such location. (NEC 410-4).
27. Provide **GFCI** protection for receptacles within 6' of all lavatories, sinks and basins. (NEC 210-8).
28. Provide **GFCI** protected receptacles at all exterior, bathroom and garage locations. (NEC 210-8, -52.)
29. Provide a wall mounted **GFCI** protected receptacle outlet within 36" of a bathroom or powder room lavatory. (NEC 210-52(d)).
30. All circuits supplying receptacle outlets in bedrooms shall be **AFCI** protected. (NEC 210-12).
31. Receptacle outlets shall be installed so that no point along the floor line in any wall space is more than 6 feet, measured horizontally, from an outlet in that space, including any wall space 2 feet or more in width. (NEC 210-52 (a)).
32. Bathroom receptacle outlets shall be supplied by at least one 20-ampere branch circuit. Such circuits shall have no other outlets. (NEC 210-52 (d)).
33. Provide a separate 20-ampere branch circuit to the laundry. (NEC 210-11©, 210-52(f), 220-16(b)).
34. Provide a minimum of two 20-amp small appliance branch circuits for the kitchen/dining/breakfast. (NEC 210-©(1), 210-52(b)(1), 220-16(a)).
35. The two or more 20-ampere small appliance branch circuits shall have no other outlets, except the receptacle installed solely for electric supply to an electrical clock in the kitchen/dining/breakfast areas or receptacles for supplemental equipment and lighting for gas-fired ranges, ovens, or counter-mounted units. (NEC 210-52 (b)(2)).
36. Receptacle outlets for ranges and clothes dryers shall be a 3-pole with ground type. Four-wire, grounding-type flexible cords will be required for connection of ranges and clothes dryers. The bonding jumper shall not be connected between the neutral terminal and the frame of the appliance. (NEC 250-140).
37. Provide a concrete encased grounding electrode of not less than 20 feet of #4 bare copper (200 ampere service). (NEC 250-50, 250-66).
38. Provide bonding to the water piping, gas and metal building systems. (Minimum #4 for 200-amp service). (NEC 250-50, 250-104).
39. All metal piping systems, metal parts of electrical equipment, and pump motors associated with the hydro massage tub shall be bonded together using a copper bonding jumper, insulated, covered, or bare, not smaller than No. 8 solid. Metal parts of listed equipment incorporating an approved system of double insulation and providing a means for grounding internal non-accessible, non-current-carrying metal parts shall not be bonded. (NEC 680-73).
